PROFILE

Year 2 IT student at Republic Polytechnic specialising in Full Stack Development. I build and deploy my own web apps, with 3 projects live on Vercel, and have built Node.js, Express and MySQL features in team projects. Looking for a web development internship where I can contribute to real products and learn from an experienced team.

PROJECTS

PC Build Planner | React, Express, MongoDB, JWT — *Live demo · GitHub*

- Built a full stack PC part picker that checks CPU socket, RAM type and PSU wattage in real time across 24 parts
- Built a REST API in Express and MongoDB so users can save, open and delete builds, deployed on Render
- Added user accounts with bcrypt-hashed passwords and JWT login, so each user can only access their own builds

Who's That Bloke? | React, Vite, CSS — *Live demo · GitHub*

- Built an 8-round football quiz where users guess Man United players from photos, with live scoring and results
- Split the app into reusable components and managed game state with React hooks; deployed on Vercel

StudyHub | Node.js, Express, MySQL, EJS — *Team project*

- Built 4 features for a web app for RP IT students (Assignment Tracker, Official Deadlines, Certifications Tracker, Homepage Dashboard) using Express routes, EJS views and MySQL, behind a session login

Time2Play | Figma (UI/UX) — *Team project · Prototype*

- Interviewed 10 parents with my team about their kids' phone habits and screen time limits to shape the design
- Designed an 8-screen mobile app, with a clickable Figma prototype, that rewards kids with points for finishing tasks to cut screen time; won the G121 Silver Medallion Award ($1,000)

PolyPath | Botpress, n8n — *Team project · GitHub*

- Gathered and organised the course and career data powering an AI career advisor chatbot for School of Infocomm students, and led the marketing to get students using it

Personal Portfolio | HTML, CSS, JavaScript, Three.js — *Live site*

- Built a 5-page responsive site with an interactive 3D model, project filters, an image gallery and a working contact form; hosted on Vercel

SKILLS

Front end	React, JavaScript, HTML, CSS, Bootstrap, Three.js
Back end	Node.js, Express, EJS, MySQL, MongoDB
Tools	Git, GitHub, Vite, Vercel, Render, Azure, Docker, Jenkins
Design	Figma, Photoshop, Illustrator
Other	Python, n8n, Botpress

EDUCATION

Republic Polytechnic — *Apr 2025 to Present*

Diploma in Information Technology (Full Stack Development)

- Relevant modules: Software Application Development, DevOps Essentials, Portfolio Development, Fundamentals of Design
- Touch Football Squad Member

Pei Cai Secondary School — *Jan 2019 to Dec 2024*

O Levels (2024), N Levels (2023)

- Class Committee Chairperson; Eagles Edusave Award for Achievement, Good Leadership and Service (MOE)

AWARDS AND CERTIFICATIONS

- G121 Silver Medallion Award ($1,000), given to top innovators in the cohort, for Time2Play
- CSS (Basic), HackerRank, 2026
- LinkedIn Learning (2026): JavaScript: Web Form Programming, JavaScript: Enhancing the DOM, PCEP-30-02 Python Cert Prep, Python Object-Oriented Programming

LEADERSHIP AND VOLUNTEERING

- Led and coordinated a group of RP students in a large-scale clean-up at Woodlands Waterfront
- Organised a school donation drive with Lions Clubs International for poverty alleviation
- Volunteered with Youth Corps Singapore, Meals on Wheels, St Luke's ElderCare and Loving Heart MSC

Interests: building gaming PCs, football
